

Perpignan, April 14, 2021

PRESS RELEASE

The Euroregion Pyrenees Mediterranean launches its new website

A website with a renewed image and logo, marking a new stage for the Euroregion

Its three members, the governments of the Generalitat of Catalonia and the Balearic Islands as well as the Occitanie Region, currently ensuring the rotating Presidency of the European Grouping of Territorial Cooperation, wish this website to be primarily intended for citizens

The time has come for the Euroregion Pyrenees Mediterranean to display its new image, renewed at the end of 2020 according to the will of its members, and to acquire a new website that is clearer, more visual and intuitive. It is based on the priorities and major projects of the Euroregion, to get to know it better.

The Euroregion, a political instrument of cooperation between its three member territories, organised in a European Grouping of Territorial Cooperation (EGCT), allows them to join forces on their common issues, reflected by the various projects of which it is the lead partner or an active partner. Whether through projects co-financed by various programmes of the European Union or calls for specific projects financed entirely by the Euroregion, it clearly positions itself in favour of the following main areas: citizens, the economy, territory and culture.

The new site is available in 5 languages (French, Catalan, Spanish, English, Occitan), a key aspect of the Euroregional will to express the richness of the cultural and linguistic diversity of its wide territory.

It not only makes it possible to follow the Euroregion's activity at a glance on social networks or through its agenda, but also to find in particular the projects developed within the framework of the COVID Support Fund for example, or still to subscribe to the newsletter, which will also reappear shortly, revamped for the occasion and full of details on current partnerships.

It is also an opportunity to start following the Euroregion and its associated projects on social networks.

The site is worth a visit on <http://www.euroregio.eu>
